

To the FCC:

The traffic and weather information that is provided by satellite radio is invaluable to its subscribers. This is a service that is a choice of the customer and one that they pay for. I urge you to reject the NAB's Petition 04-160 and support satellite radio's ability to provide this important service. The ability of the American public to receive this service should not be influenced by the lobbyists.

Sincerely,

Lewis N. Wright III
